

**An Overview of Colorado and Its Counties
according to the
USDA 2022 Census of Agriculture**

A report by Colorado State University Extension

**COLORADO STATE UNIVERSITY
EXTENSION**

June 2024

An Overview of Colorado and Its Counties According to the USDA 2022 Census of Agriculture

The *Census of Agriculture* is a count of U.S. farms and ranches and the people who operate them. Even small plots of land – whether rural or urban – count if \$1,000 or more of agricultural products were produced and sold, or normally would have been sold, during the census year. The *Census* provides the only source of uniform, comprehensive, and impartial agriculture data for every county in the nation. The *Census* is conducted every five years (years ending in “2” and “7”) by the National Agricultural Statistics Service. Questionnaires are typically mailed to farm and ranch operators in December of the census year.

This report provides selected data for the state of Colorado and the 64 Colorado counties. The characteristics, and associated data, are grouped by five primary categories: people, land, finances, crop production, and animal production. They were selected to provide an overview of production agriculture in the state of Colorado. Additional data is available at the Census of Agriculture web page <https://nass.usda.gov/Publications/AgCensus/>.

The authors – Jeffrey E. Tranel, Jenny Beiermann, and Dr. R. Brent Young – are Agricultural and Business Management (ABM) Economists with Colorado State University Extension. Additionally, Tranel, Beiermann, and Young are Faculty Affiliates in CSU’s Department of Agricultural and Resource Economics.

CSU’s ABM economists are dedicated to providing unbiased, research based education and information to people in Colorado, across the U.S., and around the world. They each have significant experience in production agriculture, familiarity with diverse populations, and skills in teaching, coaching, applied research, and scholarship. The ABM team addresses all five sources of risk – production, financial, marketing, legal/institutional, and human.

The authors hope you find the presented information useful. Please contact them with any questions or comments.
